Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowability Withdrawn

1. The indicated allowability of claims 7, 8, 21, and 22 is withdrawn in view of the reference(s) to Newton et al. (US 6,860,173 B2) and Davis et al. (5,212,865).

Rejections based on the newly cited reference(s) follow.

Claim Objections

2. Claims 7-18 are objected to because of the following informalities: In claim 7, lines 4 and 5, refer to a "threaded insert" and "first threaded insert" respectively which is slightly confusing, therefore it is suggested at line 4, to insert - -first- - before "threaded" so as to be consistent throughout the claims. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 7 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis et al. (5,212,865).

Regarding claim 7, Davis discloses an installation tool (10) for installing spiral threaded inserts (13), wherein the tool comprises a shaft (12) having a first end

including first means (30) for anti-rotation retention and guidance of a threaded insert (13), and second means (19) for securing the first threaded insert in the first means (30). *See column 2, line 34 – column 3, line 40, and figures 2-3 for further clarification.*

Regarding claim 21, Davis discloses installing threaded inserts (11, 13) by inserting a first threaded insert (13) into an installation tool (10), securing the first threaded insert (13) with separate securing means (30) in the installation tool (10) to prevent the insert (13) from falling out, and screwing the first threaded insert (13) into a tapped hole (8) of a work-piece (17). *See column 2, line 34 – column 3, line 40, and figures 2-3 for further clarification.*

5. Claims 7, 8, 21, and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Newton et al. (US 6,860,173 B2).

Regarding claims 7 and 8, Newton discloses an installation tool (10) for installing spiral threaded inserts (12), wherein the tool comprises a shaft (100) having a first end including first means (24) for anti-rotation retention and guidance of a threaded insert (12), and second means (134) for securing the first threaded insert in the first means (24). The first means (24) comprises a head (82) having an elongated circular-cylindrical bolt, which bolt has, at a front end (88) a slotted section (90) for pushing the first threaded insert (12) over the bolt. *See column 2, line 61 – column 4, line 11, and figures 2-6 for further clarification.*

Regarding claims 21 and 22, Newton discloses installing spiral threaded inserts (12) by inserting a first threaded insert (12) into an installation tool (10), securing the first threaded insert (12) with separate securing means (24) in the installation tool (10) to prevent the insert (12) from falling out, and screwing the tool the first threaded insert

(12) into a tapped hole (26) with the installation tool (10). The threaded insert (12) has a driving tang (14), wherein securing comprises securing the first threaded insert (12) in the installation tool (10) with securing means (24) on the driving tang (14) to prevent the first threaded insert (12) from falling out, and cutting off (i.e. breaking off, col. 3, lines 65-67) the driving tang (14) from the first threaded insert (12) after securing the first threaded insert (12). *See column 2, line 61 – column 4, line 11, and figures 2-6 for further clarification.*

Allowable Subject Matter

6. Claims 1, 4-6, and 19 are allowed.
7. Claims 9-18, 20, and 23-26 are objected to as being dependent upon rejected base claims, but would be allowable if rewritten in independent form including all of the limitations of their respective base claim and any intervening claims.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jermie Cozart whose telephone number is 571-272-4528. The examiner can normally be reached on Monday-Thursday, 7:30 am - 6:00 pm.
9. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bryant can be reached on 571-272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
